Subject: ART TECHNOLOGY ENDORSEMENT

Dear Mr. Odah:

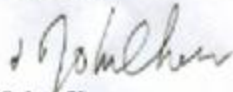

As requested, I am writing to share my experience with the ART Technology as installed at my site.

I was the Corporate Remediation Engineer for a multi-billion dollar, industrial, laundry corporation for over 13 years and was an USEPA project manager for several years. During this time, I oversaw numerous consultants with projects using various technologies.

I can confidently say that the ART Technology was the most effective we had implemented. At one of our sites, we had implemented SVE/Air sparging for more than eight years with limited success. The ART Technology was more effective in a few months than the existing SVE/Air sparging system had demonstrated in the previous eight years.

Please feel free to share this with others. If anyone should wish to inquire further, I can be reached at 816-210-7155.

Sincerely,

John Chen  
KC Engineering
